

Rinnai

LS series
Fire. Reimagined.

Fire. Reimagined.

All Rinnai fireplaces reflect our drive for innovation and performance while delivering on Rinnai's renowned quality and comfort. Our LS series range is no different. By combining leading technology with design inspired by natural landscapes and architecture, we've reimagined gas fire technology to produce a more beautiful and realistic flame which is sure to impress, becoming the talking point of your home.

New flame technology

Rinnai engineers have completely reinvented gas fire technology to achieve even more lifelike flames. Unique to the LS 800 Flametech™, flames emanate from the logs just as they do in real life, producing a more realistic aesthetic. The new technology even extends to the embers, allowing them to glow more brightly and naturally. All in all, these Rinnai Gas Fires look and feel more like real fires than ever before.

Natural beauty

Taking inspiration from natural unique landscapes, our designers created highly realistic wood and stone media for our fires. These perfectly lifelike ceramics were carefully recreated down to the finest detail to replicate hand selected driftwood and stones shaped by our rivers and tides.

Engineering excellence

The LS series of Gas Fires are all designed and manufactured by Rinnai. With qualities such as a C-frame chassis for superior strength and laser-cutting for absolute precision, the quality is understandably second to none.

Frameless elegance

Designed to give the feeling of an open fire with the safety of an enclosure, the LS series flames are captured in a sleek and virtually frameless space leaving next to nothing between you and flickering warmth.

Ultimate control

Rinnai's Gas Fire App (iOS and Android) gives you ultimate control of your LS series Gas Fire. Using the app you can monitor, thermostatically control temperature and set your desired flame height achieving the perfect level of comfort.

Non-reflective glass

To give you the perfect view of your LS series Gas Fire, the glass in all models has a special anti-reflective coating applied. It's also removable, which means it's easy to clean – keeping the view of your fire as pristine as possible.

LS 800

Featuring innovative
Flametech self-burning logs,
the LS 800 gives you the
feeling of a real open fire.

LS800SF - Single-sided Flametech

LS800DF - Double-sided Flametech

With its eye-catching design, the stunning LS 800 is sure to become the centrepiece of your home. It features Flametech, Rinnai's clever new technology that makes your fire burn more realistically than ever before. Flames emerge directly from within the logs themselves and embers glow just like the real thing alongside carefully recreated wood and stone media to achieve the perfect picture.

	Height (mm)	Width (mm)	Depth (mm)	Outer Flue Diameter (mm)	Inner Flue Diameter (mm)
Appliance dimension	970	1245	425	75	50
Glass dimension	505	800		N/A	

LS 1000

Sitting right in the middle of the series, this beautifully proportioned fire will become the focal point for any room.

LS1000S - Single-sided Log set

LS1000D - Double-sided Log set

LS1000S - Single-sided Burn media

LS1000D - Double-sided Burn media

The hardest decision you'll have to make with this gas fire is deciding which room you'll enjoy it from most. Also with a double-sided option, the LS 1000 offers twice the ambience and cosy warmth via its highly realistic-looking flame height. Its generous one metre width also gives it plenty of presence, as well as plenty of heat to warm your home.

LS 1500

A room with substantial proportions needs a fire to match. At one and a half metres wide, this truly impressive looking fire makes a statement.

LS1500S - Single-sided Log set

LS1500D - Double-sided Log set

LS1500S - Single-sided Burn media

LS1500D - Double-sided Burn media

LS 1500 is the perfect fire for large living spaces but scale isn't all it offers. With wood logs created to precisely match natural driftwood, this is nothing short of a beautiful looking fireplace. Add to that its single or double-sided options, you have a fire that's a shining example of the wow factor. This is not just a means of heating your home, it's a feature statement.

Power Flues

The Rinnai power flue system draws cold outside air for combustion, for high efficiency heating and better room air quality. Power flues are smaller in size, can have multiple bends and terminate horizontally. This means power flued appliances can be installed in almost any living or working space.

Flue Options

Side direct and side extended flueing

Up and back direct OR Up and back extended flueing

Down and out flueing
